EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative, Babak Akhlaghi, on January 4, 2004.

The application has been amended as follows:

Claim 1: Delete "multiple" before "---access providers ---" in lines 3 and 4; and insert "wherein the monitoring includes detecting connection transactions between multiple Internet protocol addresses and the access providers with the switching component" after "access providers" in line 3, to read as follows:

1. A method for securing an accessible computer system, the method comprising:
monitoring for connection transactions between multiple access requestors and access providers using a switching component connected to the access providers, wherein the monitoring includes detecting connection transactions between multiple Internet protocol addresses and the access providers with the switching component; and
denying access by an attacking access requestor to the access providers when a number of connection transaction initiated by the attacking access requestors through the switching component exceeds a configurable threshold number during a first configurable period of time.

Claim 5: cancel.

Claim 6: Change "5" to "1".

Art Unit: 2151

Claim 9: Change “5” to “1”.

Claim 15: Delete “multiple” in line 3 and 5; and insert “wherein the monitoring includes detecting connection transactions between multiple Internet protocol addresses and the access providers with the switching component” after the words “access providers” in lines 5, to read as follows:

15. A system for securing an accessible computer system, comprising:
a switching component connected to access providers having means for:
monitoring for connection transactions between multiple access requestors and the access providers, wherein the monitoring includes detecting connection transactions between multiple Internet protocol addresses and the access providers with the switching component; and
denying access by an attacking access requestor to the access providers when a number of connection transaction initiated by the attacking access requestor exceeds a configurable threshold number during a first configurable period of time.

Claim 17: Insert “the” before “multiple internet protocol” in line 3.

Claim 24: delete “multiple” in line 3.

Claim 25: Delete the “multiple” in line 3 and 5; and inset “wherein to monitor for connection transactions include to detect connection transactions between multiple Internet protocol addresses and the access providers with the switching component” after “access providers” in line 5, to read as follows:

25. A system for securing an accessible computer system, comprising:
a switching component connected to access providers to:

monitor for connection transactions between multiple access requestors and access providers, wherein to monitor for connection transactions include to detect connection transactions between multiple Internet protocol addresses and the access providers with the switching component; and

deny access by the access requestor to the access providers when a number of connection transactions initiated by an attacking access requestor exceeds a configurable threshold number during a first configurable period of time.

Claim 27: Insert “the” before “multiple Internet protocol addresses” in line 4.

Allowable Subject Matter

2. Claims 1-4, and 6-37 are allowed. The following is an examiner’s statement of reasons for allowance: Claims are considered allowable when reading the claims none of the references of record, alone or in combination, disclose or suggest the combination limitations specified in the independent claims including detecting connection transactions between multiple Internet protocol addresses and access providers using a switching component and denying access by an attacking access requestor when the number of connection transactions initiated by the attacking access requestor through the switching component exceeds a configurable threshold number during a first configurable period of time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
